(54) MEDICAL EXAMINATION BY COMPUTER

(57)Abstract:

PURPOSE: To calculate an expectation of disease, an optimum exercise prescription and an optimum diet prescription by comparing respective measuring data by a body shape measurement, a physical function measurement and a medical measurement with a memory data of a standard healthy person.

CONSTITUTION: Respective measuring data relating to a body shape, a physical function and a medical science are inputted together with an age, and a sex distinction data to a central processing unit 2 from an input device 1. In this central processing unit 2, the measured data is compared with a memory data of a standard healthy person every age and sex distinction previously stored in a memory 3 and calculated. Based on the compared data, an expectation of diseases, an optimum exercise prescription, and an optimum diet prescription are calculated and outputted an output device 4.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
